Adolescence Risk And Resilience Against

Adolescence, Risk and Resilience is concerned with demonstrating a positive approach to young people and their circumstances, and shows how the concepts of risk and resilience are related. Contributors examine a range of issues including: families and the risks they pose, mental ill-health, offending behaviour, sexual risk, disability, being in care, and social exclusion.

Adolescence, Risk and Resilience: Against the Odds ...

Adolescence is often portrayed as an age of particular risk. Adolescents are not only considered a risk to themselves, but also to the rest of society. As a society, we are nervous of them, and consider them vulnerable, yet the seeds of successful and independent adult life are laid down in adolescence, and they need all the help and support that they can get at a challenging time.

Abstract Adolescent resilience research differs from risk research by focusing on the assets and resources that enable some adolescents to overcome the negative effects of risk exposure. We discuss three models of resilience—the compensatory, protective, and challenge models—and describe how resilience differs from related concepts. We describe issues and limitations related to resilience ...
