See page 63 & 64 of that manual. If ISO is set to "A" (automatic) then it'll vary ISO from 100 to 1600 in most automatic modes. But if you switch the camera to manual, it'll actually fix the ISO at 400 (you don't want that.) If you take it out of automatic ISO mode then you get to pick the specific ISO and you can set it at ISO 1600.

If you really want to take that next step in controlling your photography, it is essential that you understand not only how to control the Creative modes offered in the Canon 50D, but why you are controlling them. Jeff Revell walks you through the Creative Zone.

P: Program Mode | The Canon 50D Creative Zone | Peachpit

The camera will not help you at all. If you shoot in manual mode but complain that the picture is too light or too dark, you are putting the cart before the horse: the whole point of manual mode is for when you know how to set the exposure better than the camera would if you let it choose them

automatically. Using manual mode should start with ...

canon - Manual Mode : Dark picture even in broad daylight ...

In manual exposure (M) mode, the exposure meter lets you know whether the current settings will expose the image properly. In the other modes, the camera indicates an exposure problem by flashing the shutter speed or the f-stop value. The technique you use to change the exposure settings depends on the exposure mode:
