ftp <Server ip-address>. 3. Then type the user name: e.g. root. 4.

Scripting in Axis Network Cameras and Video Servers

CGI is a way to invoke a command on a host in response to an action on that hosts web server. It goes way back to the early days of the web (mid to early 1990's). It can be inefficient because it may require a new process fork every time a command is invoked via this interface. And resource leaks were common.

Common Gateway Interface (CGI) With IP Cameras

About this manual This document describes CGI command usage of SONY Network Camera SNC-RX550N/P. The SNC-RX550N/P has the following kinds of CGI commands which are listed below.
