### Food losses and waste in the context of sustainable food ...

Food security is a measure of the availability of food and individuals' ability to access it. According the United Nations' Committee on World Food Security, food security is defined as meaning that all people, at all times, have physical, social, and economic access to sufficient, safe, and nutritious food that meets their food preferences and dietary needs for an active and healthy life.

### Food security - Wikipedia

Food security entails ensuring adequate food supply to people, especially those who are deprived of basic nutrition. Food security has been a major concern in India. According to UN-India, there are nearly 195 million undernourished people in India, which is a quarter of the world's hunger burden.

Guest Post by Colin Todhunter. We are currently seeing an acceleration of the corporate consolidation of the entire global agrifood chain. The high-tech/data conglomerates, including Amazon, Microsoft, Facebook and Google, have joined traditional agribusiness giants, such as Corteva, Bayer, Cargill and Syngenta, in a quest to impose a certain type of agriculture and food production on the world.
