In urban planning and architecture, typology is the taxonomic classification of (usually physical) characteristics commonly found in buildings and urban places, according to their association with different categories, such as intensity of development (from natural or rural to highly urban), degrees of formality, and school of thought (for example, modernist or traditional). Individual characteristics form patterns.

Typology (urban planning and architecture) - Wikipedia

Urban Design Defined Urban Design is the process of creating the public realm throughthe artful arrangement of buildings and site elements as cities grow and change. The public realm includes publicly-owned streets and rights of way, pathways, parks, plazas, publicly-accessible open spaces, and public and civic buildings.

Urban Design Typology Analysis - richmond300.com

Every city must identify the range of street typologies it encompasses. To ensure that new street designs are suitable for the given context, existing streets must be documented and analyzed as part of the comprehensive public space network. Evaluate each street project to balance the needs of different transportation modes within the given context and culture.

Street Typologies | Global Designing Cities Initiative

A movement of urban theorists and practitioners in the US, New Urbanism, has identified building typology as a key to defining more user-friendly places. In trying to preserve neighborhoods or building new ones, building types once again become the building blocks of the city, and may be codified in law as form-based codes.

Building typology - Wikipedia

We also examined how payment and benefit design can be blended to improve health care delivery. In this report, we develop a new typology of benefit designs under two categories— cost sharing and contingent coverage —and focus only on designs that have the potential to change consumer behavior and its alignment with payment reform.

A Typology of Benefit Designs | Urban Institute

Urban Design provides a comprehensive and accessible introduction to urban design, presenting a 3 dimensional model with which to categorise the processes and products involved. It not only defines the subject, but also considers the future direction of the field and what can be learned from the past. 50 international case studies demonstrate the variety of urban design efforts that have occurred in recent history.
