General Chapter The Dissolution ... - USP-NF | USP-NF

Dissolution medium. A suitable dissolution medium is used. The volume specified refers to measurements made between 20 °C and 25 °C. If the dissolution medium is a buffered solution, adjust the solution so that its pH is within 0.05 units of the specified pH. Dissolved gases can cause bubbles to form, which may change the results of the test.

2.9.3. DISSOLUTION TEST FOR SOLID DOSAGE FORMS

A successful dissolution method will be:

- Discriminatory
- Robust
- Correlated to In Vivo
- Transferrable
- Controlled Variability.

Discrimination.

Discrimination in Dissolution simply means being able to tell the difference between good and bad formulations. 0
