motor start-up delay that lets the diesel engine starting sounds finish before the train moves. To minimize this delay and allow the locomotive to start moving instantly, decrease CV 248 to a value of 0 using the DC Master (See Page 6 of this manual). Paragon 3 locomotives start moving at a higher track voltage than non-sound locomotives.

Until the fifties, the White Pass & Yukon relied exclusively on steam engines, with the exception of a few small yard switchers and a weird variable-gauge diesel, a prototype for the US Army. But in 1954, as it was impossible to order new steam engines from the locomotive industry, the railroad was forced to experiment with diesel power.

Hercules was a manufacturer of diesel engines until 1999. Due to economic downturns and losing government contracts, it no longer manufactures engines. The company, however, is far from defunct. As of 2010, it supplies all the parts for its original engines, and is heavily involved with engine re-manufacturing for various brands.
