clutch housing.

Because of the aluminum case, the tapered roller bearings of the transmission shafts must be fitted under preload. This is because heat expansion of the aluminum case is greater than that of the steel alloy mainshaft and countershaft cluster gear (7113).

those automotive transmissions created by the German ZF Friedrichshafen AG engineering company..

There are two fundamental types of motor vehicle transmission: . Manual - the driver has to perform each gear change (i.e., the driver is required to shift gears); Automatic - once placed in drive (or any other 'automatic' selector position), it
